

EVERYTHING IS ROSY PRODUCT MEDLEY MAY 2019

ROSE GOLD SHIMMER PAINT TIPS, TECHNIQUES, AND RECIPE

General Tips:

- Be sure to shake the bottle well before using!
- A Medicine Dropper works great for transferring shimmer paint to an applicator.
- Label applicator for future use.
- Rinse applicator immediately when done. Shimmer paint dries fast.

Techniques:

- **Take Your Pick** (#144107)—Use small and/or large stylus to apply shimmer paint as an embellishment
- **Sponge Dauber** (#133773)—Shake the bottle and dip the sponge dauber into the bottle cap. Ink stamp with shimmer paint and stamp! You can use the Stamparatus for multiple stamping on cardstock.
- **Sponge Dauber** (#133773)—Shake the bottle and dip the sponge dauber into the bottle cap. Sponge cardstock!
- **Sponge** (#141337)—Cut the sponge into quarters. Use one of the quarters to dip the sponge into shimmer paint.
- **Blender Pen** (#102845)—Shake the bottle and dip the point into the bottle cap and “paint” a stamped image.
- **Aqua Painter** (#103954)—Add 4 drops of shimmer paint and fill the remainder with 70% rubbing alcohol. Tighten the cap, shake well, and use it to paint a background on Shimmery White Cardstock or Watercolor Paper.
- **Aqua Painter** (#103954)—Dip aqua painter brush into shimmer paint lid and “flick” the brush tip inside of aqua painter lid for splatter!
- **Aqua Painter** (#103954)—Dip aqua painter brush tip into the cap and “paint” the stamped images.
- **Stampin’ Spritzer** (#126185)—Use the shimmer paint recipe (below) and fill the Stampin’ Spritzer bottle. Tighten the cap, shake well, and use it to “spritz” the background of a project.

Shimmer Paint Spray Recipe:

- Using a medicine dropper, add 8-10 drops of Shimmer Paint to an empty Stampin’ Spritzer Bottle.
- Add 70% rubbing alcohol to the same bottle. 91% rubbing alcohol will NOT work!
- Shake Well and spritz the solution on sample cardstock that you’re planning to use in the project. (Add additional drops of shimmer paint if desired.)
- Alcohol will dry within minutes and leave only the misted shimmer paint.
- Shake well before each time use.
- Label the spritzer with shimmer paint name. Reuse the same bottle for the same shimmer paint.
- Experiment with light and dark cardstock.
